

- AIRE STUDIO is a boutique studio located in Buenos Aires, Argentina, and Miami, Florida, conformed by a team of fifteen outstanding professionals from the fields of architecture, design, and technology who are passionate to pursue the art of architectural visualization.
- ❖ What sets AIRE RENDER STUDIO apart is our unique and innovate creative process wich enables us to convert your ideas into reality.

3D IMAGES

Photorealistic renders are an essential tool for visualizing and communicating projects and ideas, and especially for telling stories through images, where we bring each project to reality long before a single brick has been laid.

This is what we do WITH THE MIND AND SOUL

ANIMATIONS

Tell a project through a journey and express feelings with cinematographic resources. Music, lights and shadows, spaces and routes to discover each project as if you were right there.!

360º PANORAMIC IMAGES

An impressive solution to show the imagined space from a fixed point of view. You can establish several points connected to each other to make a Virtual Tour within one or more interconnected spaces. Let's go!

This is what we do WITH THE MIND AND SOUL

VIRTUAL REALITY

The latest trend in Real Estate, Virtual Reality is a totally interactive experience, immersed in your imagined project. A unique experience to be able to live and move in a space with virtual reality headsets or on a simple computer.

3D PLANTS

Ideal images for the sale of real estate units. A friendly and easily understood plan concept for the client.

REAL ESTATE BRANDING

A great project deserves a great name: we create and develop names, logos and branding for real estate projects, giving a style, life and aspiration to each development from scratch.
